One For ALL

With GIGABYTE's exclusive KVM, you can freely control your devices by one set of keyboard and mouse. It's even cross-platform friendly, no matter what type of OS your systems is, we all support! Just imagine you can play your mobile game on a bigger screen and have your phone charged at the same time, how convenient and fantastic!

Devices with USB-C ALT Mode

One set to control all your devices

1ms, FHD with 144Hz

AMD
FreeSync
Premium

GIGABYTE M27F is equipped with a 144Hz refresh rate which supports Adaptive-Sync & AMD FreeSync™ Premium technology, putting an end to choppy gameplay and broken frames and creates a fluid and artifact-free performance at any framerate. M27F with a blazing fast 1ms response time to fully eliminate image lag and tearing.

95% DCI-P3 with 8-bit Color

GIGABYTE M27F go with super wide gamut (**95% DCI-P3, 130% sRGB**) display and uses IPS panel with 8-bit color, the rich color performance allowing you to have detailed picture quality not only benefit on the enjoyment while gaming but also elevate the level of the color richness while enjoying the movie!

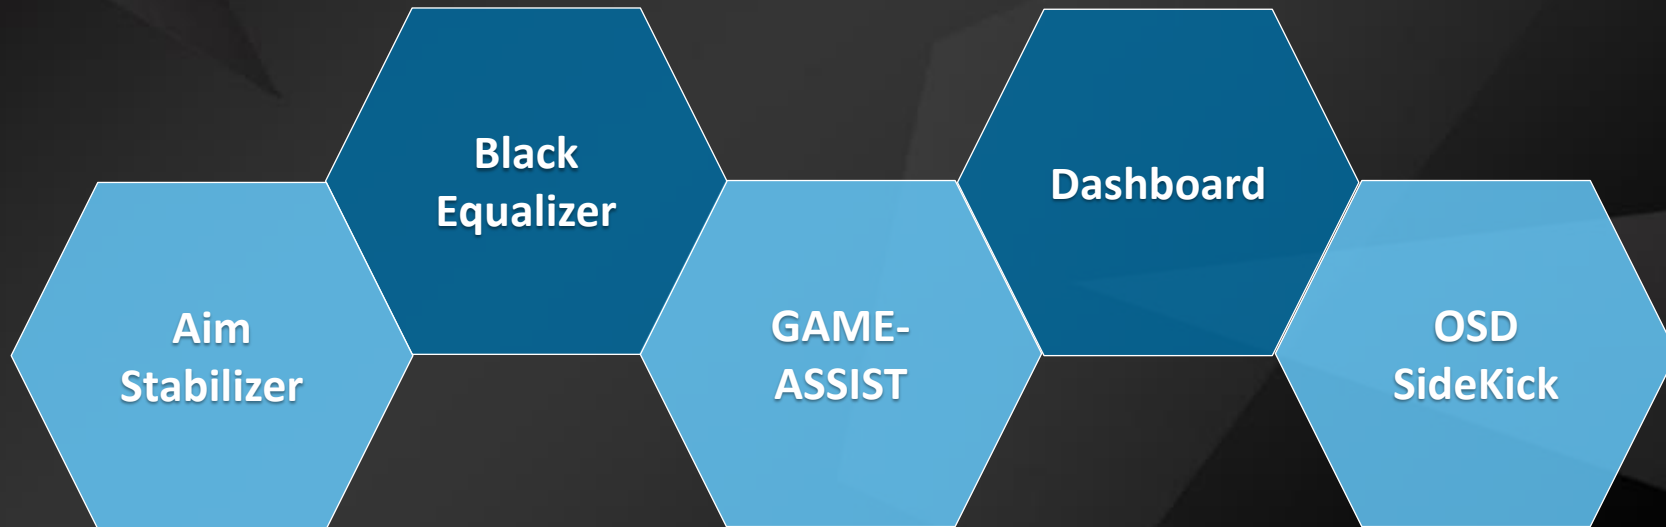

Classic Tactical Features

NO MORE HIDDEN ENEMIES

Brightens up the dark parts in the picture for better visibility in dark areas.

NOT A THING CAN BE BLOCKED

The Dashboard shows you real-time hardware information and won't be blocked by any game.

BE A BETTER SHOOTER

This feature helps reduce the blurriness of the recoil effect in the shoot game.

ALL YOU NEED IS HERE

Customizable crosshair, dashboard, auto-update and all other assistive features.

EASIEST WAY TO SET MONITOR

Allowing you to set the display options directly with keyboard and mouse.

Auto-Update

The GIGABYTE Gaming series monitors offer instant updates for both software and firmware when connecting to the internet and the exclusive FW update offers extra protection to prevent system failure from firmware updates. GIGABYTE's Auto-Update keeps monitors' performance at their best!
