XTRFY M4 TOKYO EDITION - ULTRA-LIGHT GAMING MOUSE

TOKYO EDITION.

The M4 Tokyo is a special edition of the M4 ultra-light gaming mouse, inspired by our experiences from the world's largest city – and a tribute to Japanese video game culture, tech and craft. This elegantly designed Hinomaru-inspired colorway is topped off by a glossy finish, and released in a limited quantity.

ULTRA-LIGHT, ERGONOMIC, TOP-GRADE. MEET THE M4.

Lightweight construction. State-of-the-art components. Unique, right-handed shape. The M4 takes the performance, feel and durability of lightweight gaming mice to the next level.

エクストライ

STAND OUT. IN-GAME AND IRL.

Starting Project 4, it was clear. The M4 wasn't only going to make an impression in-game – we wanted to create something special for all gamers out there. The M4 comes in a series of different colorways, with the Tokyo edition complementing the 5 original versions.

ライ

LIGHTWEIGHT DESIGN. ERGONOMIC SHAPE.

The M4 features an ergonomic, right-handed design – uniquely constructed to weigh less without compromising on shape and feel. Formed by feedback from professional esportsers as well as casual gamers, the result is a brand new shape and size.

エクス
ストリ
ファイ

GRIP AND FEEL.

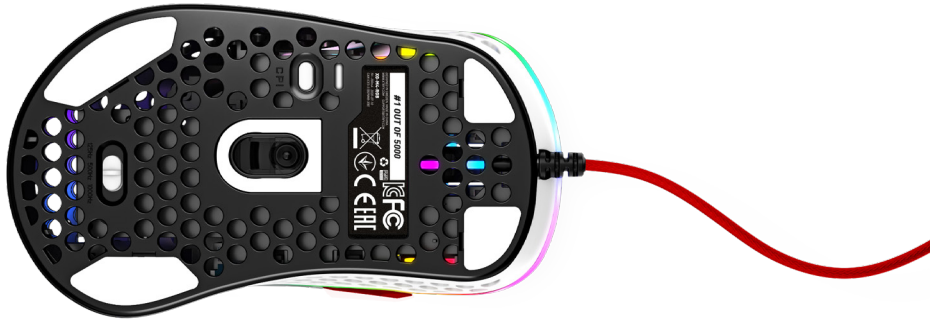

The M4 glides smoothly on 100 % PTFE skates with rounded edges. While the glossy coating in combination with the structure of holes make for an even better grip over the ergonomic mouse body. Enhancing airflow under your palm, the holes also help you stay comfortable.

エクストライ

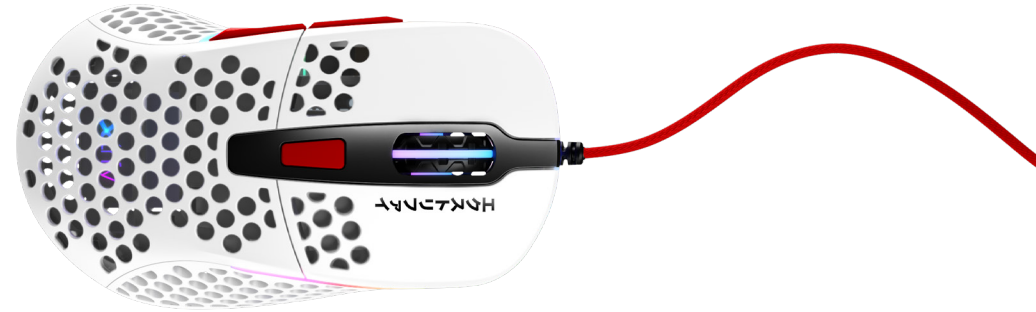

QUALITY FIRST.

The M4 is not just designed to be extremely light. It's built to last. At 69 grams, we've focused on creating the best lightweight gaming mouse rather than cutting down on durability to get rid of a few extra grams. Lower weight must never mean lower quality. No compromises.

RGB ILLUMINATION.

With customizable lighting, it's easy to add your personal touch to the M4. Choose your color. Switch between numerous LED effects. Adjust the brightness. Or turn the illumination off. All settings are made directly on the mouse.

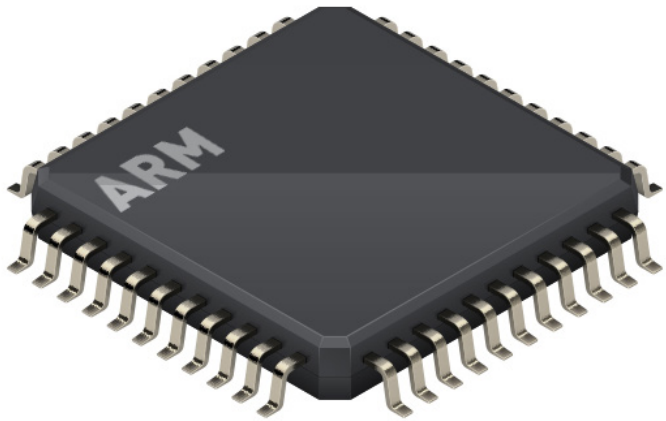

STRONG CONSTRUCTION. DURABLE COMPONENTS.

The shell of the mouse is thoroughly engineered to minimize weight while retaining durability. On the inside, the glowing Xtrfy logo is surrounded by nothing but quality components. Our Omron switches will give you 20 million pro-player optimized clicks.

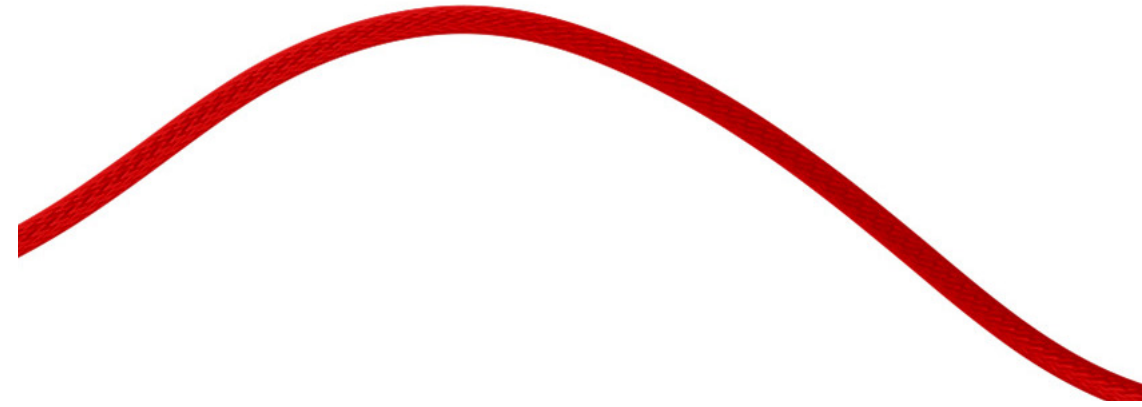

XTRFY EZCORD® PRO (NEW).

The M4 Tokyo edition comes with the new Xtrfy EZcord Pro. Softer, lighter and more flexible, but not at the cost of durability. At Xtrfy, quality comes first and the EZcord Pro is made to last.

DUST AND SPLASH RESISTANT.

We've covered the inside of the mouse in conformal coating to protect the components against dust, splashes and LAN night mishaps.

ARM 32-BIT MICROCONTROLLER.

Fast swipes require high-speed processing. The M4 is powered by an ARM 32-bit microcontroller for uncompromising speed and stability.
